

Download File PDF Recombinant Dna Technology Question

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

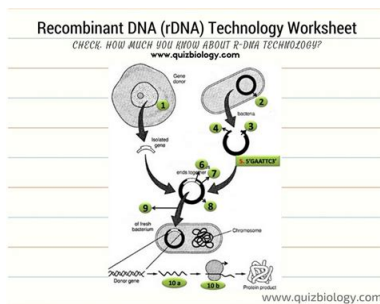

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

1. The first step in rDNA technology, labelled 1 is _____
 2. It is double stranded, self replicating, circular DNA molecule present in bacteria which is widely used as a gene cloning vector. The structure labelled 2 in the figure is _____
 3. These enzymes are called as molecular scissors which is essential for making internal cuts in a DNA molecule on vector at specific sites. The enzyme used in making cut in the vector (labelled 3) is _____
 4. The cut by the enzyme in the vector (labelled 4) creates single stranded unpaired regions of DNA. This type of cut pattern is called as _____
 5. **StuAATTC** is a restriction site of a widely used restriction enzyme which produces sticky ends. The enzyme is _____
 6. In the figure labelled 6, the DNA strand is the _____
 7. This enzyme is called as molecular glue which is used to join two DNA strands by forming phosphodiester bond. The joining enzyme, labelled 7 is _____
 8. The vector (plasmid) with foreign gene inserted is called (labelled 8) _____
 9. The figure labelled 9 is the process of introducing recombinant vector into a suitable host like bacterium. The process is called _____
 10. In the figure, 10 a and 10 b are processes that lead to the formation of protein product encoded by the gene of interest. 10 a and 10 b are _____
